\* Food waste as referred to in Article 1 of Commission Delegated Decision (EU) 2019/1597. Food waste reported here shall exclude amounts of food losses and food drained as or with wastewaters. As the unit is in tonnes of fresh mass, the food waste amounts shall include also an estimate of the water content when it was in the status of food fresh mass. Data on food drained as or with wastewaters are reported separately, also in tonnes of fresh mass.

\*\* Total food waste including edible and inedible parts of the food but excluding food drained as or with wastewaters

\*\*\* Amounts of food waste excluding the inedible parts of the food

Note: The Commission encourages countries to provide voluntary data on the disaggregated amounts of edible food waste and food drained as or with wastewaters; Eurostat acknowledges that the quality of voluntary data is not as high as expected for mandatory data.

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | In primary production, only business entities that are registered in activity A by NACE Rev.2 are included. These are extremely few compared to agricultural holdings, which are not registered in activity A. As a result, data on food waste in primary production are underestimated, and data on food waste in households are overestimated. The explanation for the difference between the years is provided in cell G82 in the Quality report sheet. |
| 2  | In the stage of the food supply chain "Restaurants and catering", in addition to the amounts of food waste generated in the catering industry (activity I Accommodation and catering according to NACE Rev. 2), the amounts of food waste generated in other institutions, where food is served such as schools, kindergartens, hospitals, nursing homes, etc are also included.                                                                           |
| 3  |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
